

IFEOLUWA OSINUGA

Software Engineer

osinugaifeoluwa1@gmail.com | +2349160591907 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with a Computer Science background, specializing in React, Next.js, and TypeScript, with hands-on fullstack and AWS cloud experience from a six-month engineering internship spanning frontend, cloud, and ML/AI teams. Shipped three fullstack products solo, from design through deployment. Comfortable moving between UI craft and backend/infra work and looking to bring that range to a product team.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Shadcn, Daisy UI

Mobile: React Native, Expo

Backend & Data: Node.js, PHP, PostgreSQL, MySQL, Prisma ORM, REST APIs, GraphQL, Firebase, Supabase

Cloud & DevOps: AWS (EC2, Amplify, Cognito, S3, VPC, Rekognition, Textract, DynamoDB), Terraform

Tooling: Git/GitHub, Vite, Jest, Figma, Postman, Chart.js, React Context API

WORK EXPERIENCE

Cecure Intelligence Limited | *Engineering Intern*

Apr 2025 – Sep 2025

Structured six-month rotation across frontend development, design engineering, cloud engineering, and machine learning/AI, working on client-facing products alongside senior engineers.

- Built responsive, pixel-perfect UIs in React.js, TypeScript, and Tailwind CSS on the CecureStream team, integrating APIs via GraphQL and covering key components with Jest tests.
- Contributed to a KYC verification system combining AWS Rekognition (facial recognition & liveness detection), Textract (OCR/document parsing), and Cognito (OAuth 2.0 authentication) — production-track identity-verification pipeline.
- Provisioned cloud infrastructure as code with Terraform (VPCs, subnets, EC2 instances, Application Load Balancers) and deployed serverless applications via AWS Amplify.
- Designed wireframes and high-fidelity prototypes in Figma and ran UX research, applying accessibility and component-based design principles later carried into implementation.
- Worked in agile stand-ups and code reviews; authored technical documentation, architecture diagrams, and pitch decks for cross-functional stakeholders.

PROJECTS

Interneefy — Internship Management System | *Fullstack Developer*

Sep 2025

- Built a multi-tenant fullstack platform with role-based dashboards for company admins, supervisors, and interns, covering registration, task assignment, progress tracking, and end-of-internship feedback.
- Implemented the frontend in Next.js, React, TypeScript, and Tailwind CSS with React Context API for cross-dashboard state management.
- Built backend services in Node.js with PostgreSQL and Prisma ORM, designing the schema to support three distinct user roles and permission levels.

ExamPulse — Mobile Exam Notification & Scheduling System | *Fullstack Developer*

2026

- Built a cross-platform mobile app (Android & iOS) using Expo and React Native, enabling students to view personalised exam timetables and receive real-time push notifications via Firebase Cloud Messaging (FCM).
- Developed an AI-powered Next.js admin dashboard that automatically parses university timetable PDFs using Gemini AI, allowing administrators to manage schedules and trigger notifications.
- Implemented automated exam reminders using node-cron and a Node.js/Express backend with Firebase as the database. Final year project — Lagos State University.

CampusCycle — Student Free-Cycling Platform | *Fullstack Developer*

Apr 2026

- Designed and built a responsive platform enabling students across multiple universities to list, browse, and claim free items, reducing friction in campus-to-campus item exchange.
- Built the full stack solo — TypeScript and Tailwind CSS frontend, PHP/MySQL backend — including listing, browsing, and claim workflows.
- Validated the core flow with a small group of student testers ahead of a planned wider campus rollout.

EDUCATION

Lagos State University

Graduated Aug 2026

BSc Computer Science (First Class) — Software Engineering, Web & Internet Technology, Java, Algorithms & Data Structures, Systems Design & Security, Data-Driven Computing, Databases, Computer Architecture & Networking

AltSchool Africa

Graduated Oct 2025

Front End Engineering Certificate — HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Web Accessibility

CERTIFICATES & HONORS

- AltSchool Africa Front End Engineering Certificate
- Upskill by Cardtonic 3.0 — Winner
- ZuriX14G Internship Certificate — Fullstack Development Track
